

# **SULTANSAZLIGI - TURKEY REED CUTTING ACTION PLAN**

## **I. INTRODUCTION**

**This protected area is wetland inside step ecosystem. Also between Africa, Europe and Asia two main migratory birds road is crossing on this protected area. It has two protected statues. These are Nature Conservation Area and Ramsar Site. It has two different ecosystem, salty and fresh water ecosystem.**

**There are 3200 Ha. Marshes area inside Protected Area. Every year about 400 person from four villages around Protected Area cut reed in the Marshes area. They cut completely of Marshes area. Their problem is sharing of Marshes area. Because they use tridational system. So this conditation is create conflict between each other, between village and village, between reed cutter and PA's guards. Another problem, they do reed cutting at the reproduce time of birds. This conditation is negative effect especially population of migratory birds.**

## **II. GOAL**

**To arrange reed cutting activity.**

## **III. OBJECTIVES**

- 1. To provide sustainable use nature resources**
- 2. To avert conflict**
- 3. To create reproduction and life site for migratory birds.**

?? To much earn demand of reed cutter

**V. ACTIVITIES**

<b>Activities</b>	<b>Indicators of Success</b>	<b>Resources Needed</b>
<b>1. To prepare a Participatory Reed Cutting Plan</b>	<b>Everybody accepted a plan</b>	<b>- Consultant - Budget</b>
<b>2. To identify core zone and village reed cutting zone</b>	<b>- Everybody accepted core zone - Every village accepted reed cutting zone</b>	<b>- Consultant - PAMA -Stakeholders - PA's Map</b>
<b>3. To mark core zone and village reed cutting zone</b>	<b>- To conservation marker equipments</b>	<b>- Consultant - PAMA - Representative of stakeholder - PA's Map - Marker equipment - GPS</b>
<b>4. To implement plan</b>	<b>- Not to cut in core zone - Not to be conflict between village and vilage</b>	<b>- Map of Reed Cutting</b>
<b>5. Monitoring and evaluation</b>	<b>- Not to cut in core zone - Not to be conflict between village and village - Creating population of birds</b>	<b>- GPS - Map of PA - Envantories</b>

## **VI. STAKEHOLDER ANALISYS**

### **POSSITIVE IMPECTED;**

<b>Possitively Impected Entity</b>	<b>How Impected</b>
<b>1. PA Manager</b>	<b>So much work to solve problems</b>
<b>2. Rangers</b>	<b>So many patrol in Protected Area</b>
<b>3. Guards</b>	
<b>4.Jandarma</b>	
<b>5. Local directors</b>	<b>To avert conflict and to create agreement</b>
<b>6. Reed company owner</b>	<b>To direct obey Reed Cutting Plan</b>

### **NEGATIVLY IMPECTED;**

<b>Negativly Impected Entity</b>	<b>How Impected</b>
<b>1. Reed Cutters</b>	<b>- to cut completely of Marshes land - to create conflict between reed cutters and PA's Guards -To set fire to Marshes land - to cut before beginning of cutting date</b>
<b>2. Reed Companies Owner</b>	<b>- to direct negatively</b>
